

GENERAL MEETINGS

SEPTEMBER OCTOBER - 1947

No general meetings were held in Sept. and October. Instead the League presented two speakers in open meetings in Kauper Hall at Millikin Conservatory.

On Sept. 25th Dr. Edwin Reeder of The School of Education at Univ. of Illinois, was heard on the subject, "Education for a Dangerous World". Dr. Reeder's keen knowledge and kindly wisdom were deeply appreciated by all who heard him.

On October 23 Mr. A.E. Staley of Decatur, a member of the National Food Conservation Committee, gave us a report of the recent comm. meeting held in Washington. He did more than give a meager report. There were interesting and amusing side lights and a most serious discussion of the need for the program. Mr. Staley urged us to support the program of Saving at Home and Relief to Europe even totaking the gamble that it will be the right and best thing for our nation as well as for Europe. We thank Mr. Staley for his appearing for the League and their guests. The report of this meeting which appeared in the Decatur Herald is on file in the Secretary's book.
